

MODULE CATEGORIES OVER FINITE POINTED TENSOR CATEGORIES

CÉSAR GALINDO AND MARTÍN MOMBELLI

ABSTRACT. We study exact module categories over the representation categories of finite-dimensional quasi-Hopf algebras. As a consequence we classify exact module categories over some families of pointed tensor categories with cyclic group of invertible objects of order p , where p is a prime number.

Mathematics Subject Classification (2010): 18D10, 16W30, 19D23.

Keywords: Tensor category, module category, quasi-Hopf algebra.
